Drawings

Figures 23-26 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Divisional

U.S. Patent Application Serial Number 10/717,685 is a divisional of U.S. Patent Application Serial Number 09/506,347. The Applicant has voluntarily cancelled claims 1-8 and 14-27. Claims 9-13 and newly presented claim 28 have been examined on the merits.

Reasons for Allowance

The following is an Examiner's statement of reasons for allowance:

The prior art of record fails to fairly, teach, show or suggest, by either anticipating or rendering obvious, the invention as set forth in the claims of the instant application.

Furthermore, an update of a search previously made does not detect the combined claimed elements as set forth in the pending claims. Additionally, the reasons for allowance of the claims over the prior art of record is believed to be clear from the prosecution history taken as a whole. More particularly, the instant invention (as set forth in independent claim 9)

Art Unit: 2652

provides for an optical head inclusive of, *inter alia*, a reflecting mirror and an optical bench which maintains a light source and the reflecting mirror. The reflecting mirror is mounted to the optical bench in a manner such that no reference surface is formed in a portion of the optical bench where the reflecting mirror is mounted; a mounting angle of the reflecting mirror relative to the bench is specified instead by reference to an external jig.

The closest prior art includes Kasahara et al. (US 5,237,57) who discloses an optical head having a reflecting mirror (41) mounted to a tilt adjusting member (15), which is mounted to a carriage of the optical apparatus.

Kasahara et al. (US 5,237,57), however, does not disclose wherein the mounting of the reflecting mirror (41) is performed with reference to an external jig, such that no reference surface of an optical bench is used in specifying a mounting angle of the mirror. Since member (15) is a permanent fixture of the optical head of Kasahara et al. (US 5,237,57), it is not an “external jig” used to provide the requisite reference surface. The Applicants’ instant invention as claimed, uses the external jig for specifying the mounting angle of the reflecting mirror with no need for reference surfaces of the optical bench, as has been conventionally done.

Kasahara et al. (US 5,237,57) fails to disclose the claimed invention as set forth in the manner, function and relationship relative to other claimed structure as prescribed by the independent claim 9.

Additionally, Kasahara et al. (US 5,237,57) does not provide, alone or in combination with the art of record or general knowledge within the art, any suggestion or teaching for the invention as set forth in the independent claim 9.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
